# Renewable Generation

Over the next few years, Spark is aiming to provide 100% of our customers with a renewable source of power. Whilst this is a challenging target, we believe it's not only good for the planet but makes good commercial sense.

We already have deals in place to purchase renewable power from several generation schemes across the UK, but we are always looking for additional sources to help us on our way to becoming 100% green.

## How to join us

If you are a larger renewable generator, typically generating over 500kW, we would like to talk to you about setting up a power purchase agreement with us. We can offer you competitive prices for your export and your renewable certificates (ROCs and REGOs).

We are interested in technologies with high load factors, e.g. sustainable bio-generation and anaerobic digestion schemes.

If you are a renewable generator of the size and type described above, we'd really like to hear from you. Please contact Helen Hill on 01750 505 294 or [helen.hill@sparkenergy.co.uk](mailto:helen.hill@sparkenergy.co.uk)
